

JS Master+ IP68/IP65

DN25, DN32 & DN40 single-jet vane-wheel water meter

JS Master+ IP68/IP65

JS Master+ IP68/IP65 is a single-jet vane-wheel dry water meter for precise measurement of water supply consumption. The advanced design engineering ensures a high dynamic response to metering conditions and a high immunity to strong magnetic fields. The water meter is compatible with optical and induction data communication modules from Apator Powogaz S.A. for automatic wired or wireless meter reading. The water meter is designed and manufactured to the MID (Measuring Instruments Directive) and complies with EN14154, OIML R49 and ISO4064 for the maximum measurement range of R100.

Application

Cold water supply systems (max. 50°C) and hot water supply systems (max. 130°C) in multifamily housing, industrial facilities, public facilities, and metering stations. The maximum operating pressure (MOP) is 16 bar. The water meter is designed for installation in a horizontal orientation with the counter upward (H ↑) or sideways (H →), and in a vertical orientation (V). The rotary counter provides easily readable indications directly from the front face and works well in different installation orientations. The standard IP68 version is compatible with directly installed induction data communication modules which feature #UTIP (Universal TI Plug), whereas the IP65 water meters support optical and induction data communication modules mounted using an interface ring.

JS Master+ IP68

JS Master+ IP65

The robust counter safety cover protects against ambient conditions.

Compatible with optical and induction data communication modules.

The counter is hermetically sealed with the IP65 rating.

The water meter identification data can be easily read from the counter cover, even with a remote reading module installed.

The counter mechanism features a rotation lock at 358° of turn.

The magnetic shielding and purposefully shaped external guard provide high resistance to external magnetic fields.

The inlet strainer protects the metering unit from debris.

The double-sided bearings of the rotor ensure its stable performance throughout the verification interval.

The optimised geometric features of the magnetic coupling with multi-pole magnets ensure an extremely high resistance to decoupling.

JS Master+ IP65 hot water meter version

JS Master+ IP 65 cold water meter version

Advantages

Economy:

- Precise measurements at R100 – H
- Remote meter reading via wired or wireless interfaces
- Protection against:
 - strong magnetic field effects (by magnetic shielding)
 - mechanical tampering (a robust, tamper-proof counter design)
 - multiple rotations of the counter by more than 358°

Convenient use:

- The water meter is AMR (automatic meter reading) (MDMS)-capable and provided with #UTIP in the IP68 version for direct installation of induction data communication modules, while the IP65 version is compatible with optical and induction data communication modules which feature an interface ring
- Easily readable:
 - the counter can be oriented anywhere within 0 to 358°
 - hermetically sealed, non-fogging IP68 counter: the counter mechanism is sealed in a copper-glass enclosure with a copper guard
- Wireless reading-capable via:
 - Induction communication modules: IN-WMBUS, IN-GSM for the IP65 and IP68 versions
 - APT-O3A-3 optical communication module for the IP65 version
- Wired reading-capable via:
 - Induction communication modules: IN-PULSE for the IP65 and IP68 versions
 - Optical communication modules: APT-MBUS-NA-2 and AT-MBUS-NE-03 for the IP65 version
 - NK reed relay pulse transmitter for the IP65 version

Reliability:

- Tested and robust design
- Long operating life thanks to advanced materials:
 - with high resistance to wearing (in the bearings and pivots)
 - with a surface texture which minimises flow resistance (on the rotor and sealing disc)
- The inlet strainer (which protects the metering unit from debris)
- The counter mechanism is protected against mechanical damage

Key features

- Output of event alarms: when equipped with an RF communication module, the water meter can indicate removal or breaking off of the module, module operating disturbance, reverse flow, leaks, etc.
- The rotor bearings, other solutions and materials used ensure stable metrology over the service life
- IP68 rating: the water meter is capable of operation in extremely difficult ambient conditions (even when fully immersed in water), including with a data communication module installed
- Highly aesthetic water drop-shaped design of the counter safety guards and covers
- Stable flow rate inlet bore design
- Double-sided rotor bearings
- Available in the IP65 version with a reed relay pulse transmitter

New design of the cover and the face, exemplified by the IP65 counter (for hot and cold water)

Regulatory and standards compliance

- Directive 2014/32/EC of the European Parliament and of the Council of 26 February 2014 on the harmonisation of the laws of the Member States relating to the making available on the market of measuring instruments
- OIML R 49-1:2006 – Water meters intended for the metering of cold potable water and hot water. Part 1: Metrological and technical requirements
- OIML R 49-2:2013 – Water meters intended for the metering of cold potable water and hot water. Part 2: Test methods
- OIML R 49-3:2013 – Water meters intended for the metering of cold potable water and hot water. Part 3: Test report format
- EN 14154-1:2005+A2:2011 – Water meters. Part 1: General requirements
- EN 14154-2:2005+A2:2011 – Water meters. Part 2: Installation and conditions of use
- EN 14154-3:2005+A2:2011 – Water meters. Part 3: Test methods and equipment
- EN ISO 4064-1:2017 – Water meters for cold potable water and hot water. Part 1: Metrological and technical requirements
- EN ISO 4064-2:2017 – Water meters for cold potable water and hot water. Part 2: Test methods
- EN ISO 4064-5:2017 – Water meters for cold potable water and hot water. Part 5: Installation requirements
- EC type examination certificate no. SK 21-MI001-SMUU071
- Classification of environmental climate and mechanical conditions: Class B (ref. PN-ISO 4064-1:2014 (E))
- Classification of mechanical environment conditions: Class M1 (ref. Polish Regulation Dz.U. 2007.3.27)
- Classification of electromagnetic environment conditions: Class E1 (ref. Polish Regulation Dz.U. 2007.3.27)

All materials of the JS Master+ IP68/IP65 water meters have PZH-NIH Hygiene Certificates for use with potable water.

Versions:

* Version -02 – IP65-rated counter mechanism; supports readout with induction communication modules (Ti) and optical communication modules (IR)

** Version -07 – IP68-rated counter mechanism sealed with mineral glass enclosure with a copper guard; supports readout

with induction communication modules (Ti)

*** Version XX-NK or NKP reed relay transmitter; supports reed relay pulse transmitters

**** For cold water versions only

Connection fittings

DN	G	g	d	l1
25	1¼"	1"	29	46.5
32	1½"	1¼"	36	56
40	2"	1½"	43	66

Example of the Master+ IP68 water meters with compatible data communication modules:

IN-GSM clip-on module, #UTIP (Universal TI Plug)

DN	25	32	40
H1	mm	149	
H2	mm	153	

IN-WMBUS clip-on module, #UTIP (Universal TI Plug)

DN	25	32	40
H1	mm	140	
H2	mm	160.5	

Example of the Master+ IP65 water meters with compatible data communication modules:

IN-GSM clip-on module with the interface ring

IN-WMBUS & IN-PULSE clip-on modules with the interface ring

Water meter with the reed relay transmitter (NK) installed
